Education

M.E.Sc.
Electrical Engineering
Communication Systems and Data Networking
Network Security
Western University
Sept 2021 - Aug 2023
London, ON.

B.E.Sc
Electrical Engineering
Wireless Communication
Western University
Sept 2016 - Apr 2021
London, ON.

Skills

- **Allen Bradley PLC programming**
  - (FactoryTalk, DNET,RSLogix, RSLinx)
- **AutoCAD**
- **PCB Circuit Design**
  - (Microcap, EAGLE, Soldering)
- **MATLAB**
- **C++**
- **Python**
- **Assembly**
- **Scripting**
  - (Linux, Bash, Perl)
- **Git**
- **HTML/CSS**
- **Engineering tools**
  - (QuartusII, Arduino, SOLIDWORKS)
- **Project Management**
- **Welding**
  - (MIG, Stick, Oxy-Acetylene)
- **Manufacturing**
  - (Lathe, Machining, Plasma-cutting)

Overview

I am a highly motivated Electrical Engineering Graduate with a diversity of interests and expertise. My multi-domain knowledge from other interests and experience in my life put me ahead of everyone else around me. My curiosity, ability to learn quickly along with my tenacious passion put towards my work paired with the ability to critically think and easily apply what I learn throughout my schooling and career sets me apart from the herd.

Work Experience

Graduate Teaching and Research Assistant
Western University - London, ON Sept 2021 - Current

- Course: ECE3331B (Introduction to Signal Processing)
  - Monitor and mark assignments, midterms and labs.
  - Course is heavily reliant on MATLAB and Simulink.
- Course: ECE4436A (Networking)
  - Monitor and mark assignments, midterms and labs.
  - Linux · Socket Programming · Network Protocols · Python
- Course: ECE2236B (Magnetic Circuits and Transmission Lines)
  - Mark and proctor Assignments and Midterms

Electrical Engineering Intern (Controls)
General Motors - Ingersoll, ON May 2019 - May 2020

- Create PLC programs using Allen Bradley PLC Software (Factory Talk, DNET, RSLogix, RSLinx)
- Departmental DNET backup during the plant shutdown down due to first covid-19 wave.
- Create original PLC program solutions.
- Update electrical drawings in AutoCAD and document the changes in the company database.
- Cross-functional teamwork (Canada -> USA)
- Quality defect isolation and solutions line-side and in-plant.
- Project Management (PM delegation, SAP ordering, supplier relations, communicating project roles to contractors, millwrights, and/or electricians, supervising other engineer's and my own projects)
- Upholding Ontario Electrical Safety Code (OESC).
- Update company database for: Lockout Zones/Tags, Safety zones, PLC programs, DNET.
- Work with Controls Engineers to solve maintenance problems

Awards and Projects

- 2023 Graduate Symposium Outstanding Presentation in Communication Systems Engineering
- Dean's List Honoree 2017-2018
- Capstone: Smart cane elderly alert system
  - Capstone role: GPS data polling, data formatting, SMS message formatting, send SMS to contacts
- Project 2: Welder Power Supply with PID
- Project 1: Student card automatic door access
